-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Art Unit: 2816

1. Applicant's election of species A (Fig. 1), corresponding to claims 1-28 is hereby acknowledged, and claims 29-60 are withdrawn from consideration.

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1, 10, 11, 17, 19, 24 and 28 are rejected under 35 U.S.C. 102(b) as being anticipated by Kyriakos et al.

As to claims 1, 11, 17, 19 and 28, note Fig. 1, where the recited "resistive array" reads on the combination of resistors within block 11 (see column 1, lines 27-29); the recited "first switch" reads on switch 16; the recited "second switch" reads on switch 17; and the last four lines of claim 1 are deemed to be inherent in the operation of Kyriakos et al's Fig. 1 variable attenuation circuit.

As to claims 10 and 24, the recitation of the input signal is merely intended use (because it is not part of the inventive circuitry) and thus cannot be relied upon to define over the prior art.

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this

Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 2-9, 12-15, 18, 20-23, 25 and 26 are rejected under 35 U.S.C. 103(a) as being unpatentable over Kyriakos et al.

The limitations of these claims (e.g., making the switches using transistors, etc) are all seen to be obvious well-known features in the semiconductor art and therefore do not define patentably over Kyriakos et al under 35 USC 103.

4. Claims 16 and 27 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

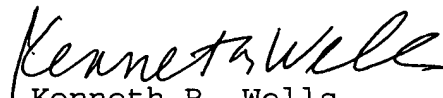

Note Fig. 2 of Cuddy which is also seen to anticipate at least claims 1 and 19.
